<p&gt;:.&lt;/p&gt;
<p&gt;&lt;/p&gt;&lt;p&gt;To fully exploit the constrained width, avoid loadin
g the neighbouring structures and straddle shared utilities running under the si
te, the
         , house was constructed using a lightweight steel frame on a piled sla
b. The steelwork was prefabricated as a series of
                                                    portal frames that were cr
aned down the alley and site-welded together. Given that every inch in such a na
                was valuable we chose to fully weld the connections and express t
rrow space
he frame internally, even utilising the depth of the , steels to maximise the
space.</p&qt;
<p&gt;Alongside the painted steel a simple palette of spruce plywood, douglas
fir joists, terrazzo and cork
                          , flooring enriches the interior. Externally th
e timber framed walls are clad in handmade pewter glazed brick slips with a pati
        that reflects the changing light of the sky. Both the simply landscaped a
na
nd planted rear courtyard and the garden in
                                           , front of the house enhance the f
eeling of space in this small dwelling.</p&gt;
<p&gt;This self-build project had a long gestation, fitted
                                                         , in around prof
essional and family life. The design and construction were developed as time and
money allowed so whilst planning
                                   , consent was given in January 2014 and the
ground works commenced in the spring of 2024, the building was not
                                                                       completed
until August 2024. We worked closely with friend and joiner Michael Tye to lead
                       , subcontractors and employed specialist fabricators fo
a small team of local
r certain key packages as well as undertaking a fair amount of the work ourselve
s.</p&gt;
<p&gt;The
                 result is a unique and highly crafted home that is a testament
