Amazing Spider Solitaire is a card game where you stack all given cards in the deck by ascending or descending order. Train your brain by playing solitaire that require skill, strategy and patience to win. In addition to the solitaire experience, you can enjoy features such as reshuffling cards, counting your moves, and checking your overall statistics to see your playing habits and achievements. There are three difficulty settings, and also three game modes so you can find the perfect pace for you: One suit, two suits, and four suits. Don't forget to take advantage of hints and the undo/redo power-ups! Don't forget to share Amazing Spider Solitaire with your friends! You must connect multiple bubbles by dragging your cursor across them. Every successful connection clears the tiles and earns you points. Amazing Spider Solitaire is created by Amazing Hedgehog. Play their other game on Poki: Amazing Word Fresh, Amazing Bubble Connect, and Amazing Dominoes You can play Amazing Spider Solitaire for free on Poki. Amazing Spider Solitaire is playable on your computer and mobile devices such as phones and tablets.

A escala de escanteio, tambem conhecida como escala de Richter, e uma escala logaritmica aberta em eixo, utilizada para medir a magnitude de sismos, ou terremotos. Desenvolvida em 1935 por Charles F. Richter, essa escala tem como objetivo quantificar a magnitude de um tremor, baseando-se na amplitude da onda de maxima amplitude em um sismograma de comprimento padrao de tempo, normalmente trinta segundos.

A escala de Richter e uma escala aberta, o que significa que o nro tem limite mximo ou mnimo. Um aumento de um nro na escala corresponde a um aumento de aproximadamente 32 vezes na amplitude da onda ssmica medida. Por exemplo, um terremoto de magnitude 5 e 10 vezes mais forte que um de magnitude 4 e 1000 vezes mais forte que um de magnitude 2.

Alm disso, a escala de Richter e logaritmica, o que significa que cada aumento de unidade na escala corresponde a um aumento de 10 vezes na magnitude do terremoto. Assim, um terremoto de magnit
